HQ USEUCOM Celebrates 50th Anniversary

Fifty years ago three European component commands: U.S. Naval Forces, Eastern Atlantic and Mediterranean; U.S. Air Forces Europe; and U.S. Army Europe officially combined under a new joint headquarters, the U.S. European Command. USEUCOM's creation marked the beginning of a successful relationship between U.S. forces in Europe and the on-going commitment of support to NATO. Today it encompasses three continents and more than 91 countries.

Help U.S. European Command celebrate its golden anniversary Aug. 1. Fun for the entire family begins at 6:45 a.m. with an Organizational Run around Patch Barracks. The formal ceremony begins at 11 a.m. followed by a picnic and children's events at Husky Field. View live-action displays from all branches of the military and participate in the directorate/organizational volleyball tournament. Live music will be available from Barry P. Foley as well as a DJ. Listen to AFN radio for updates as the event gets closer.

The Stuttgart German-American Wandering Club's annual volksmarch is this weekend: July 27, 10 a.m. to 2 p.m., and July 28, 6:30 a.m. to 1 p.m., beginning and ending on Robinson Barracks.

Supplement Use Can be Fatal

A soldier recently died during physical training from an apparent fatal cardiac event. He was likely taking a nutritional supplement containing a combination of the herbs Ma Huang and Guarana. Another soldier, taking a similar supplement, was treated for a heat related injury during physical training. Nutritional supplements marketed as weight loss products, performance enhancers or fat burners may contain potentially dangerous ingredients, which given the right conditions may result in permanent injury or death. Of particular concern is the use of these substances with strenuous exercise.

The Food and Drug Administration regulates dietary supplements under a different set of regulations than those covering conventional foods and drug products. Under the Dietary Supplement Health and Education Act of 1994, the dietary supplement manufacturer is responsible for ensuring that a dietary supplement is safe before it is marketed. Generally, manufacturers do not need to register with FDA nor get FDA approval before producing or selling dietary supplements. Using these supplements is strongly discouraged by health professionals. For info go to the Web site <http://familydoctor.org>.
